

Car Safety Seats 2020 List

The type of seat your child needs depends on several things, including your child's age, size, and developmental needs.

Here is a list of car safety seats (manufacturer names are **boldfaced**, weight is in pounds [lb], and height is in inches ["]). See *Car Safety Seats: 2020 Guide for Families* for information about choosing the most appropriate car safety seat for your child.

NOTE: All products listed meet Federal Motor Vehicle Safety Standard 213 as of the date of publication. Car safety seats may be available that are not listed in this publication. Prices are approximate and may vary. The following information is current as of the date of publication. Before buying a car safety seat, check the manufacturer's instructions for important safety information about proper fitting and use.

The National Highway Traffic Safety Administration (NHTSA) has put together the car safety seat Ease-of-Use Ratings to educate parents and caregivers about car safety seat features and to assist them in finding the appropriate seat for their needs. You can view the ratings at www.safercar.gov/parents/CarSeats/Car-Seat-Ratings-Ease-Of-Use.htm.

Although the American Academy of Pediatrics (AAP) is not a testing or standard-setting organization, this publication sets forth AAP recommendations based on the peer-reviewed literature available at the time of its publication and sets forth some of the factors that parents should consider before selecting and using a car safety seat.

Rear-Facing-Only Seats (Used rear facing. All seats have a 5-point harness.)
